Getting Started

Install Quickstart

Quickstart allows you to get working Apla Network locally in minutes. Watch the video below how to install it.

Watch the video

OR Go to Apla Testnet

Apla Testnet is the our platform's blockchain network for testing purposes. Try out the latest Apla features. Start building the future, today.

[Explore Testnet right now](#)

Meet Molis

The Apla Platform client application that we use to develop applications, manage access rights and work with database tables. Everything is here.
